## Mixed traffic trajectory data - Legend

October 14, 2014

The trajectory data is shared publically at the address: $\underline{h t t p: / / t o l e d o . n e t . t e c h n i o n . a c . i l / d o w n l o a d s / ~}$

When using this data, please use the following reference:
Kanagaraj V., Asaithambi G., Toledo T. and Lee T.-C., Trajectory data and flow characteristics of mixed traffic, paper presented at the 94th Annual Meeting of the Transportation Research Board, Washington DC, January 2015.

The data is presented in two parts - two excel files for the data collected in the periods 2:45-3:00 PM and 3:00-3:15 PM, respectively, on February 13, 2014. Each excel sheet contains 12 columns of data:

| Column | Item | Remarks |
| :---: | :---: | :---: |
| 1 | Vehicle number | Consecutive numbers. Numbers are not matched between the two files |
| 2 | Vehicle type | $\begin{aligned} & \text { 1- Motorcycle } \\ & 2 \text { - Car } \\ & 3 \text { - Bus } \\ & 4 \text { - Truck } \\ & 5 \text { - Light commercial vehicle } \\ & 6 \text { - Auto-Rickshaw } \end{aligned}$ |
| 3 | Time (seconds) | Time from beginning of recording ( 0 is at 2:45PM and 3:00PM, respectively). The time interval is 0.5 seconds. |
| 4 | Vehicle length (meters) |  |
| 5 | Vehicle width (meters) |  |
| 6 | Longitudinal position (meters) | Position of the front of the vehicle. Measured from the upstream end of the section |
| 7 | Longitudinal speed (meters/second) | Instantaneous speed of the vehicle. |
| 8 | Longitudinal acceleration (meters/second^2) | Instantaneous acceleration of the vehicle. |
| 9 | Lateral position (meters) | Position of the center of the vehicle. Measured from the left-most side of the roadway. |
| 10 | Lateral speed (meters/second) | Instantaneous speed of the vehicle. Positive (negative) values represent movement to the right (left). |
| 11 | Lateral acceleration (meters/second^2) | Instantaneous acceleration of the vehicle. |
| 12 | Flag | Represents manual correction of data points where overlap among vehicles occurred. <br> 0 - No correction <br> 1 through 7 - Data was manually modified to eliminate overlap with other vehicles. It is suggested that these observations will not be used for microscopic-level analysis |
